

# Thesis notes

8th February

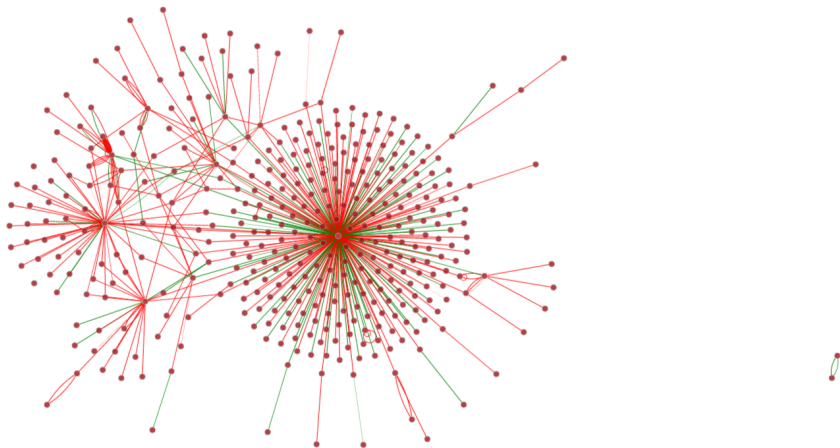

# About Twitter data (1)

- ▶ Replies to *retweet* correspond to replies to the original tweet
- ▶ *Quote replies* instead have their own replies

- ▶ Most of the time *Quote replies* receive very few comments. For one @POTUS status there are only around 10 *Quote replies* with 1 comment.

## About Twitter data (2)

**Figure:** Graph built on previous @POTUS tweet, including *Quote replies*

## About Twitter data (3)

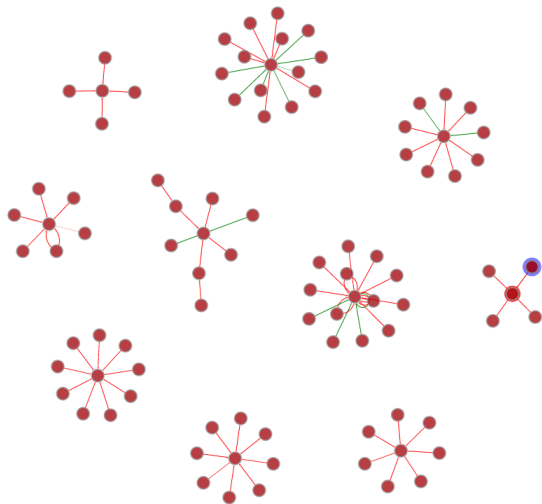

Figure: Graph built on 10 statuses with  $> 5$  replies containing "covid"

# About Reddit data (1)

- ▶ Crossposts are few, even for most diffused posts
- ▶ Most of the times there are a handful of posts with around 5 comments
